**NEW COMPETENCE CENTRE WITH NEW HEAD**

Nifisk Advance AG is going to set up a competence centre for municipal vehicles and street sweeping machines in its Rhine-Main branch in Linsengericht (Germany). Stefan Bassermann will be in charge of sales. Bassermann, who has already demonstrated his sales and managing qualities in reputable companies in the exterior cleaning and site maintenance sector, will take up his duties on 16.07.2007. The 42-year old prefers to spend his limited spare time on the squash court or riding. Bassermann will be responsible for the sale of the Egholm, Holder and Leiber brands in the Rhine-Main area. He will take care of the marketing of the Nifisk street sweeping machines RS 501, RS 850 and RS 1300 and the new multi-function vehicle RS 2200 (launch date August 2007) throughout Germany. He will be assisted by experienced marketing and workshop staff from the competence centre. The high degree of their competence and the geographical location in the centre of Germany were decisive for the location choice.
